

*Top Ten Things to Know  
for Cloud Developer  
Exam*

Google Cloud

# GCP Top Ten Things to Know for Exam

---

## Top Ten Things to Remember before taking the exam!.

---

1. Ensure you know BigQuery inside and out. Over 12 questions were directly tested on Bigquery. Know how to ensure performance (reduce latency) in queries, know how to connect to services, load data from various sources, validate Query
2. Control access around services with BigQuery. Datasets are what? “Collection of tables” and thus learn ACLs’, service accounts, etc
3. Have a concise background for Kubernetes Engine (kubectl/gcloud cli commands) . Error Codes 400/403
4. Cloud SQL Use cases, Scaling. Connect with APIS, Understand Roles with Cloud SQL > Cloud SQL Client Cloud SQL Editor Cloud SQL Admin. Know how to connect via console and CLI. (Connections) SSL or w/o ssl , Connect App Engine to Cloud SQL
5. Know your use cases for data services. Connecting to Services(Cloud Storage, App Engine, Kubernetes Engine, Cloud Pub/Sub, Cloud Dataflow and Cloud Endpoints).

---

## Top Ten Things to Remember before taking the exam!.

---

6. Cloud Spanner. At least 7 questions. Know use case, how to scale and minimize costs, Spanner has two important connection decisions - The instance configuration and the node count

---

7. IAM Permissions basics. Know what service accounts are, know how to setup up audit logs for auditors and logging best practices. Customize Permissions for Hybrid

---

8. Wow. 10 questions plus!!! Stackdriver logging setup, setup alerts and difference between Stackdriver modules. Debug and Trace heavily tested. Stackdriver APIS

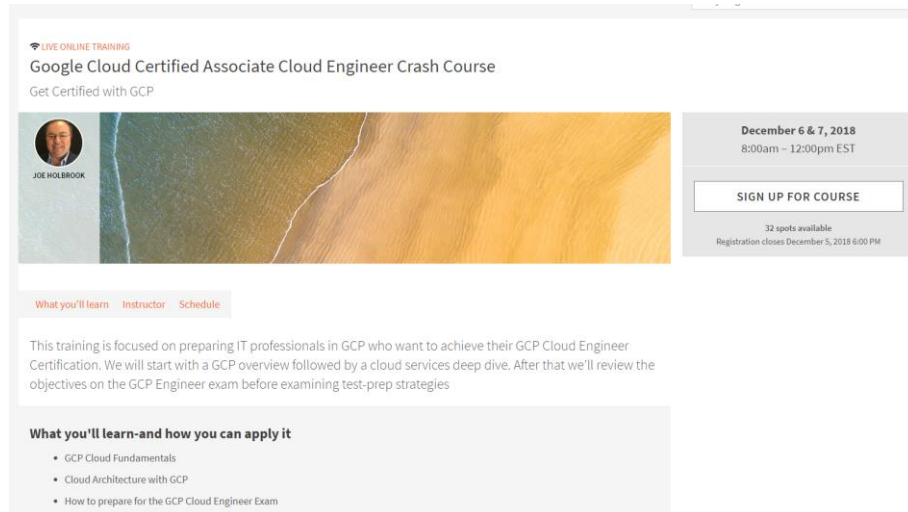

---

9. Cloud Build, Know your build steps, Automatic vs manual. Integrate with Cloud Repositories. Custom builds steps (Memorize). Speed Up Builds and CI Pipelines

---

10. Lots of Deployment Manager Templates and Python scripts to debug. Know you error codes

# Course to Learn More About Google

**LIVE ONLINE TRAINING**  
**Google Cloud Certified Associate Cloud Engineer Crash Course**  
Get Certified with GCP

**December 6 & 7, 2018**  
8:00am – 12:00pm EST

**SIGN UP FOR COURSE**

32 spots available  
Registration closes December 5, 2018 6:00 PM

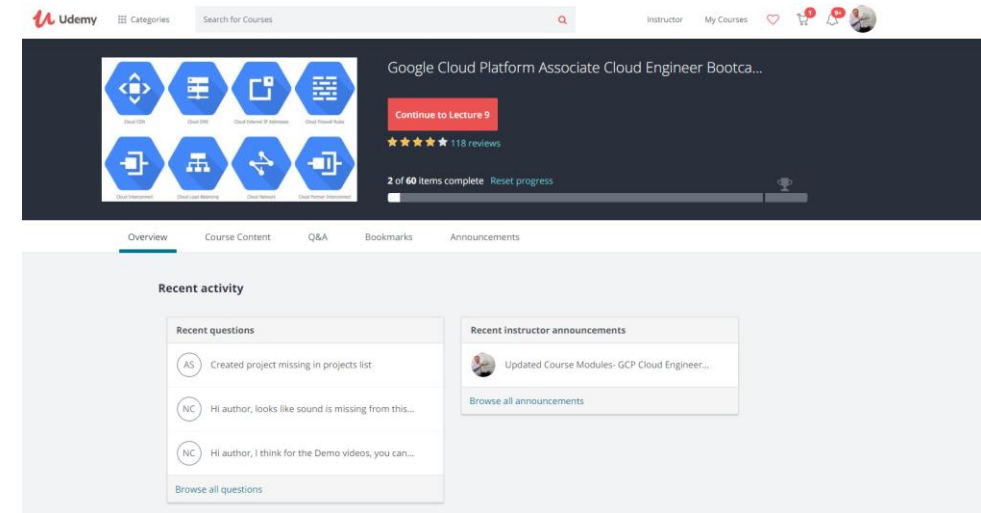

**What you'll learn** **Instructor** **Schedule**

This training is focused on preparing IT professionals in GCP who want to achieve their GCP Cloud Engineer Certification. We will start with a GCP overview followed by a cloud services deep dive. After that we'll review the objectives on the GCP Engineer exam before examining test-prep strategies

**What you'll learn-and how you can apply it**

- GCP Cloud Fundamentals
- Cloud Architecture with GCP
- How to prepare for the GCP Cloud Engineer Exam

Pearson Safari Live Online 8 Hour

**Udemy** Categories Search for Courses Instructor My Courses

**Google Cloud Platform Associate Cloud Engineer Bootcamp**

**Continue to Lecture 9**
